Military Solid-State Relays Selection Guide

- Silicon Carbide
- Optical Isolation
- Bidirectional
- High Voltage
- Short-Circuit Protection
- Current Limiting
- AC or DC
- Low Leakage
Teledyne Relays has been the world’s innovative leader in manufacturing ultraminiature, hermetically sealed, electromechanical and solid-state switching products for more than 50 years. The company’s comprehensive product line meets a wide range of requirements for defense and aerospace, industrial, commercial, medical and RF & wireless uses.

**Business Focus**
- MIL QPL & COTS Solid-State Relays
- MIL QPL & COTS Electromechanical Relays
- HiRel (Space) Electromechanical Relays
- RF & Microwave Relays & Coaxial Switches
- Industrial Solid-State Relays
- Switching Matrices

**Markets**
- Commercial & Military Aviation
- Defense & Aerospace
- Telecom/Communications (Wireless)
- Instrumentation & Test
- Industrial Power & Motion Control
- Medical Applications

Teledyne Relays has embraced a “continuous improvement” culture. With recognized certifications such as Boeing D6-82479, MIL-STD-790, AS9100C and ISO 9001:2008, Teledyne Relays has become a primary supplier of switching solutions with the highest quality and reliability to industry leaders around the world.

**Technical Service & Customer Support**
Teledyne Relays provides easy access to technical service and customer support. Our websites make it easy to find technical information, buy products and even get e-mail responses within 24 hours. Switching solutions are only a mouse click away at www.teledynerelays.com or at teledyne-europe.com. Information about coax switches is available at www.teledynecoax.com.

---

**Product Assurance**
Under an aggressive Total Quality Management (TQM) program, Teledyne Relays has embraced a “continuous improvement” culture. With recognized certifications such as Boeing D6-82479, MIL-STD-790, AS9100C and ISO 9001:2008, Teledyne Relays has become a primary supplier of switching solutions with the highest quality and reliability to industry leaders around the world.

---

**20 Years of Life-Cycle Testing** — Series CD and HD solid-state relays have undergone 105,000 hours of permanent testing without a single failure. That’s the equivalent of 480 million cycles. Test conditions featured a full load at 50% duty cycle, 85°C ambient temperature and V-load = 60 Vdc. The test parts met all given specifications.

Appendix: Quality Conformance Inspection 9

Appendix: Glossary 10

---

**InP1012**

- Greater than 40Gbps bandwidth
- Frequency range, DC to 60GHz
- Small form factor, 3mm X 3mm X 1mm
- High isolation
- Low insertion loss
- Switching time of less than 100ns

See Page 11

**RF121 / GRF121**

- Broader bandwidth (DC - 18GHz)
- Signal integrity up to 40Gbps
- SPDT, Magnetic Latching
- Metal Enclosure for EMI shielding
- High Repeatability
- 3 Million Cycle Life

See Page 12

Series LD Optically Isolated, Silicon Carbide DC Solid-State Relay

Series LD solid-state relays utilize MIL-PRF-28750 test methods and are packaged in low-profile hermetically sealed cases. These relays are constructed with state-of-the-art solid state techniques and feature fully floating power FET output technology. This allows the load to be connected to either output terminal and provides a low ON resistance. The input and output are optically isolated.

- High Voltage
- Optical isolation
- Meets 270 Vdc requirements of MIL-STD-704
- Low-profile hermetic package
- Meets MIL-PRF-28750 requirements

Series C63 Optically Isolated DC Solid-State Relays

Series C63 solid-state relays use an advanced design capable of switching heavy loads in a physically small 6-pin mini-DIP package. These relays have a power FET output that ensures low ON resistance and low leakage current. Optical isolation ensures complete protection of signal lines, power and ground bus and control circuits from switching noise and EMI.

- Low ON-state resistance
- Up to 1A output
- Optically isolated
- Floating output
- Through-hole or surface-mount configuration

Series FR75-1 Optically Isolated, Short-Circuit Protected DC Solid-State Relays

The FR75-1 solid-state relay utilizes a power FET switch that is protected against short circuits and overload currents. The short-circuit protection feature provides protection when a short or overload occurs while the relay is on as well as when the relay is switched into a short. The FR75-1 is packaged in a low-profile mini-DIP metal package.

- Optical isolation
- Low OFF-state leakage
- Switches high currents
- High noise immunity
- High dielectric strength

Series CD Optically Isolated, Short-Circuit Protected DC Solid-State Relays

The CD solid-state relay utilizes the latest FET technology to provide a low ON resistance. The control circuit is buffered to enable the relay to be driven directly from standard CMOS or open-collector TTL logic circuits. Available options include short-circuit, current overload protection, and control status. Both options are available either together or separately as standard features.

- Fast switching speed
- Optical isolation
- Meets 28 Vdc requirements of MIL-STD-704
- Low-profile hermetic ceramic package
- Meets MIL-PRF-28750 requirements

### Options

- Short-Circuit Protection
- Control Status

### Part Number:

- **CD00CF**
  - Load Voltage: 60 Vdc
  - Load Current: 2 Adc
  - ON Resistance: 0.22 Ω
  - Bias Supply Voltage: 3.8–6 Vdc
  - CMOS Control: 250 µA

- **SCD00CF**
  - Load Voltage: 60 Vdc
  - Load Current: 2 Adc
  - ON Resistance: 0.22 Ω
  - Bias Supply Voltage: 3.8–6 Vdc
  - CMOS Control: 250 µA

- **CD01CF**
  - Load Voltage: 60 Vdc
  - Load Current: 2 Adc
  - ON Resistance: 0.22 Ω
  - Bias Supply Voltage: 3.8–6 Vdc
  - CMOS Control: 250 µA

- **SCD01CF**
  - Load Voltage: 60 Vdc
  - Load Current: 2 Adc
  - ON Resistance: 0.22 Ω
  - Bias Supply Voltage: 3.8–6 Vdc
  - CMOS Control: 250 µA

- **CD20CD**
  - Load Voltage: 60 Vdc
  - Load Current: 1 Adc
  - ON Resistance: 0.45 Ω
  - Bias Supply Voltage: 3.8–6 Vdc
  - CMOS Control: 250 µA

- **SCD20CD**
  - Load Voltage: 60 Vdc
  - Load Current: 1 Adc
  - ON Resistance: 0.45 Ω
  - Bias Supply Voltage: 3.8–6 Vdc
  - CMOS Control: 250 µA

- **CD21CD**
  - Load Voltage: 60 Vdc
  - Load Current: 1 Adc
  - ON Resistance: 0.45 Ω
  - Bias Supply Voltage: 3.8–6 Vdc
  - CMOS Control: 250 µA

- **SCD21CD**
  - Load Voltage: 60 Vdc
  - Load Current: 1 Adc
  - ON Resistance: 0.45 Ω
  - Bias Supply Voltage: 3.8–6 Vdc
  - CMOS Control: 250 µA

*“W” suffix denoting Teledyne’s S²R reliability screening level or “Y” suffix denoting MIL-PRF-28750 level must be added to the part number. See Appendix, page 14.

Series HD True-Output Status-Feedback DC Solid-State Relays

The HD solid-state relay utilizes the latest technology to provide a low ON resistance and an optically isolated output. The control circuit is buffered to enable the relay to be driven directly from standard CMOS or open-collector TTL logic circuits. Available options include short-circuit and current overload protection. The second option is a status output line.

- Fast switching speed
- Optical isolation
- Meets 28 Vdc requirements of MIL-STD-704
- Low-profile hermetic ceramic package
- Meets MIL-PRF-28750 requirements

### Options

- Short-Circuit Protection
- Switch Status

### Part Number:

- **HD00CF**
  - Load Voltage: 60 Vdc
  - Load Current: 2.1 Adc
  - ON Resistance: 0.15 Ω
  - Isolation Type: Optically Isolated
  - Operating Temperature: 3.8–32 Vdc
  - CMOS Control: 250 µA

- **HD02CF**
  - Load Voltage: 60 Vdc
  - Load Current: 2.1 Adc
  - ON Resistance: 0.15 Ω
  - Isolation Type: Optically Isolated
  - Operating Temperature: 3.8–32 Vdc
  - CMOS Control: 250 µA

- **HD20CF**
  - Load Voltage: 60 Vdc
  - Load Current: 2.1 Adc
  - ON Resistance: 0.15 Ω
  - Isolation Type: Optically Isolated
  - Operating Temperature: 3.8–32 Vdc
  - CMOS Control: 250 µA

- **HD22CF**
  - Load Voltage: 60 Vdc
  - Load Current: 2.1 Adc
  - ON Resistance: 0.15 Ω
  - Isolation Type: Optically Isolated
  - Operating Temperature: 3.8–32 Vdc
  - CMOS Control: 250 µA

- **HD24CF**
  - Load Voltage: 60 Vdc
  - Load Current: 2.1 Adc
  - ON Resistance: 0.15 Ω
  - Isolation Type: Optically Isolated
  - Operating Temperature: 3.8–32 Vdc
  - CMOS Control: 250 µA

*“W” suffix denoting Teledyne’s S²R reliability screening level or “Y” suffix denoting MIL-PRF-28750 level must be added to the part number. See Appendix, page 14.
Series KD/LD Optically Isolated, Short-Circuit Protected DC Solid-State Relays

Series KD and LD solid-state relays utilize MIL-PRF-28750 test methods and are packaged in low-profile hermetically sealed cases. They feature fully floating power FET output technology. Options include short-circuit and current overload protection plus a status output line. Switch status returns the true status of the output switch and is optically isolated from the load.

Series KD44CF DC Solid-State Relays with Flat Trip Short-Circuit Protection

The KD44CF solid-state relay utilizes MIL-PRF-28750 test methods. These relays feature fully floating power FET outputs that allow the load to be connected to either output terminal and provides a low ON resistance. A trip status indicator turns on when an overcurrent condition has occurred and the short-circuit protection has been activated.

Series LPBD100 Normally Closed Dual-Output DC Solid-State Relays

The LPBD100 is a dual-output 100 Vdc plastic relay. The relay output-switch contacts are normally closed and will conduct the load current until a voltage is applied to the relay input. With 4 volts or more at the relay input, the output-switch contacts open and the relay no longer conducts. The LPBD100 assembly contains two independent, completely isolated relays.

*Fast switching speed
*Optical isolation
*Meets 28 Vdc requirements of MIL-STD-704
*Low-profile hermetic package
*Meets MIL-PRF-28750 requirements

• Short-circuit and overload protected
• Trip status
• Meets 28 Vdc requirements of MIL-STD-704
• Low-profile hermetic ceramic package
• Meets MIL-PRF-28750 requirements

• Compact SIP plastic package
• Dual output: two relays in one package
• Optical isolation
• Two MOSFETs for reliable operation
• Low voltage drop

SPECIFICATIONS SUBJECT TO CHANGE WITHOUT NOTICE © 2019 TELEDYNE RELAYS
Series LPD Normally Open Dual-Output DC Solid-State Relays

Series LPD dual-output plastic relays offer internal thermal protection. They utilize optical isolation for excellent input-to-output isolation. The LPD offers a current-limiting output to protect itself and associated load circuits from transient current overloads. During an overcurrent condition, the LPD clamps the current to a safe operating value.

- Current limiting output
- Thermal protection
- Automatic recovery
- Overload protection
- Low voltage drop

Series M33-2N Transformer Isolated, High-Surge-Current DC Solid-State Relays

The M33-2N is a military-style DC solid-state relay designed for high-current pulse load applications. It features the latest power FET output technology to minimize ON resistance. This feature provides minimum output voltage drop and allows the M33-2N to switch high pulse currents up to 100 amps at higher temperatures than those allowable with bipolar devices.

- Fast switching speed
- Optical isolation
- Transformer isolated
- Low-profile, hermetic, 22-pin metal DIP
- Meets MIL-PRF-28750 requirements

Series SR75 Optically Isolated, Short-Circuit Protected DC Solid-State Relays

The SR75 solid-state relay utilizes a power FET switch that is protected against overload and short-circuit currents. The short-circuit protection feature not only provides protection should a short or overload occur while the relay is on, but will provide protection should the relay be switched into a short. It comes in through-hole or surface-mount 16-pin DIP packages.

- For AC application using a bridge rectifier
- Low OFF-state leakage
- Switches high voltages and currents
- High noise immunity
- High dielectric strength

ZD Optically Isolated, Short-Circuit Protected DC Solid-State Relays

Series ZD solid-state relays use an advanced design capable of switching heavy loads in a physically small 6-pin DIP package. These relays have a power FET output that ensures low ON resistance and low leakage current. Optical isolation ensures complete protection of signal lines, power and ground bus and control circuits from switching noise and EMI.

- Short-circuit protected
- Overload protected
- Low OFF-state leakage
- Trip status on ZD24 series
- Compact 6-pin DIP package

A47F Optically Isolated DC Solid-State Relays

The Series C47F miniature solid-state relays utilize a photovoltaic generator driving high-performance power FET chips to provide low-output on resistance and high-output switching capability. The virtual elimination of offset voltage makes these relays ideal for low-level switching applications as well. Bidirectional switching versions (Series C46F) are available.

- 14-pin DIP package
- Switches high voltages and currents
- Optical isolation
- Floating output
- High noise immunity

Series C75 DC Solid-State Relays with Short-Circuit Protection and Trip Status

Series C75-2 solid-state relays are packaged in a 16-pin DIP, with surface-mount or through-hole mounting available. They utilize a power FET switch that is protected against overload and short-circuit currents. 2S versions provide an open-collector trip status feedback to the relay’s control side. 2SH versions add an internal transient voltage suppressor for inductive loads.

- Optically isolated
- Low OFF-state leakage
- Switches currents to 1 Adc
- High dielectric strength
- Through-hole or surface-mount configuration

Series 2305115-2T 3-Phase AC Solid-State Relays
The 2305115-2T relay is a 3-phase solid-state relay with status indication. Relay inputs and outputs are optically isolated. The 2305115-2T relay is designed for 3-phase, 47–440 Hz applications where low EMI and reliable operation under conditions of severe environmental stress are a requirement.

- No heat sink required
- ESD class 2 compliance per MIL-STD-833, method 3015
- Compliant with MIL-STD-704D
- Status verification of the input command

Model with flange mount available (above). Flange is for mounting purposes only and does not serve as a heat sink.

Series 652 Optically Isolated AC Solid-State Relays
The Series 652 is an AC output solid-state relay designed for power switching. It incorporates a sealed, optically coupled solid-state relay as a zero-voltage turn-on driver. The input circuit is TTL logic compatible. Output switching is accomplished by back-to-back SCRs with a built-in snubber circuit, which provides reliable switching of both resistive and reactive loads.

- Qualified to MIL-PRF-28750
- Zero-voltage turn-on, zero-current turn-off
- Logic compatible input
- Sealed aluminum case
- High transient immunity and low EMI

Series 682 Optically Isolated AC Solid-State Relays
The 682 is a state-of-the-art solid-state relay designed for use in AC power switching applications. Back-to-back SCRs are configured for zero-voltage turn-on and can handle current surges up to 8A. The patented circuit design assures the lowest possible EMI by virtually eliminating commutation spikes while maintaining excellent noise immunity.

- Qualified to MIL-PRF-28750
- Zero-voltage turn-on SCR output
- Logic compatible input
- Extremely low EMI
- Low-profile metal DIP package

Series KA/LA Optically Isolated AC Solid-State Relays

Series KA/LA solid-state relays are designed for use in AC power switching applications where safety and reliability are primary concerns. They are ideal for resistive and reactive loads with power factors as low as 0.2. Inverse parallel SCRs are configured for zero-voltage turn on. The relays are available with thermal protection and thermal trip status.

- Optical isolation
- Fully floating output
- Buffered control
- Integrated snubber circuit
- Low-profile hermetic package

### Specifications

- **QB00FM**
  - High voltage output
  - Low ON resistance
  - Power FET output
  - Fast switching speed
  - High surge current capability

### Series QB00FM Bidirectional and DC Output Bidirectional Solid-State Relays

The QB00FM relay is an advanced solid-state bidirectional relay designed specifically for high-speed switching in ATE systems. These devices provide high reliability, low life-cycle cost and exceptional switch performance. The QB has very fast turn-on times of under 1 msec. Optical coupling minimizes EMI generation.

- High voltage output
- Extremely low leakage current (200 nA)
- Bidirectional power FET output
- Fast switching speed
- Low-profile metal 6-pin mini-DIP

### Series FB Low-Leakage, High-Voltage Bidirectional and DC Solid-State Relays

The Series FB relay is an advanced solid-state bidirectional relay designed specifically for high-speed switching in ATE systems. These devices provide high reliability, low life-cycle cost and exceptional switch performance. The FB has very fast turn-on times of under 1 msec. Optical coupling minimizes EMI generation.

- High voltage output
- Extremely low leakage current (200 nA)
- Bidirectional power FET output
- Fast switching speed
- Low-profile metal 6-pin mini-DIP

### Series FB00CD, FB00FC, FB00KB

- **FB00CD**
  - High voltage output
  - Low ON resistance
  - Power FET output
  - Fast switching speed
  - Low-profile metal 6-pin mini-DIP

  - High voltage output
  - Low ON resistance
  - Power FET output
  - Fast switching speed
  - High surge current capability
Series C60 Optically Isolated DC and Bidirectional Solid-State Relays

Series C60 solid-state relays use an advanced design capable of switching very heavy loads in a physically small 6-pin mini-DIP package. These relays have a power FET output that ensures low ON resistance, no offset voltage and low leakage current. In addition to switching DC loads, the versatile C60 can switch AC and bidirectional loads as well. Moisture Sensitivity Level (MSL) 1

<table>
<thead>
<tr>
<th>Term</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>DSCC</strong></td>
<td>Defense Supply Center Columbus. Organization that provides information and recommendations to contractors on commonality and selection of parts, and to manufacturers for qualification of the parts.</td>
</tr>
<tr>
<td><strong>DSCC Drawing</strong></td>
<td>This is a drawing created by DSCC for parts manufactured to a military specification but are not yet qualified to that specification. These parts may be used in military programs until a slash sheet is created and parts are qualified to the military specification.</td>
</tr>
<tr>
<td><strong>MIL-PRF-28750</strong></td>
<td>General specification for solid-state relays. This military specification covers the design, construction, manufacture, performance, test, and screening of military solid-state relays. Relays qualified to this specification are JAN branded and are suitable for all military programs.</td>
</tr>
<tr>
<td><strong>Relay, Solid-State (SSR)</strong></td>
<td>A relay with isolated input and output whose functions are achieved by means of electronic components without moving parts.</td>
</tr>
<tr>
<td><strong>Relay, Zero-Voltage Turn-On</strong></td>
<td>A relay with isolated input and output in which added control circuitry delays the output turn-on until the zero-voltage transition of the AC sine wave.</td>
</tr>
<tr>
<td><strong>Short-Circuit Protection</strong></td>
<td>A feature incorporated into the output circuit of a solid-state relay to protect the relay and circuitry against a shorted load. The relay output will turn-off should a short occur. The output can be reset from the control.</td>
</tr>
</tbody>
</table>

![Graph](image)

**Status, Switch**  
Indicates the state of the output. It operates independently of the control/bias and will return a status as long as load voltage and load circuit continuity exists. It is generated from the load supply and creates an offstate leakage from 600 μA to 2 mA.

**Status, Flow**  
Indicates whether there is load current flowing. It operates only when the output is conducting and has a threshold of 10% to 20% of the maximum rated output current. It does not create an OFF-state leakage, but only operates when the output circuit is conducting.

**Status, Trip**  
This type of status is only applicable for short-circuit protected relays. It provides an indication when the short-circuit protection has been activated and the output has tripped off. It does not indicate the normal state of the output.

**Status, Control**  
This type of status provides an indication of control circuit continuity. It is analogous to the second set of contacts of a double-pole electromechanical relay. It does provide much higher output drive capability than the other types of status outputs.
Description

The InP1012 Series is a highly compact, reflective SPDT Active RF switch, manufactured using Teledyne’s high speed, low-loss InP HEMT process. The switch die is packaged in a low-loss, surface mount package, with a small form factor: 3mm(L) x 3mm(W) x 1mm(H). It supports a wide frequency range from DC to 60GHz, and delivers low insertion loss, fast switching time, and good isolation-making this switch ideal for test and measurement, microwave communications, and radar applications. The unique construction features and manufacturing techniques provide excellent robustness to environmental extremes and overall high reliability.

Features

- High digital bandwidth, greater than 40Gbps
- Very high linearity
- Low insertion loss
- Very fast switching time of less than 100ns
- Radiation tolerant up to 100 krads

Series GRF121 Electromechanical Relays
The ultraminiature GRF121 relay is designed to provide a practical surface-mount switching solution with RF performance and repeatability to 18GHz. The GRF121 improves on Teledyne Relays' heritage of miniature RF relays by incorporating a precision transmission line structure in the internal construction of the contact system. GRF121 relays feature a unique ground shield to facilitate surface mounting and to extend the frequency range when compared to through-hole solutions.

- Eye Width: 13.34 ps
- Jitter_{pp}: 8.73 ps
**Description**

The Mini Matrix Series is an ideal solution that incorporate Teledyne Coax Switches’ for off the self, easy to use application. The Mini Matrix Series is designed to allow the remote operation of SPDT, Transfer, or SP3T to SP8T Multi-Throw switches. Remote operation is accomplished via TCP/IP commands to the Matrix’s Ethernet interface. Switch control is also accessible via the USB virtual serial port, using the provided command set. Through these interfaces the Coax Switch can be switched to the desired position and its position can be read for verification. The default switch position at power up can be set by the user.

### Options
- USB only or USB & Ethernet Control
- Terminated or Non-Terminated
- Failsafe or Latching
- Various Connectorcs
- Multiple Frequency Ranges

### Number of Switches

| 1 to 2 SPDT, Transfer, or SP3T-SP8T |

### Switching Type

- Electromechanical

### Temperature

- Operating: –40°C to +65°C

Teledyne has over 50 years of experience in developing a wide spectrum of custom solutions.

Experienced in Custom Hybrid Solutions

Teledyne Relays is a leading manufacturer with the capability of providing build-to-print solutions on hybrid microcircuits devices. Our current products portfolio includes solid state power controllers, DC/DC converters, high current drivers, digital-analog converters, activator control hybrids, deflection amplifiers, base drivers, custom designed multi-layers thick-film/thin film substrates and many more...

With over 50 years of heritage in serving the space, aerospace, and defense markets, Teledyne continues to uphold the same standards and commitment to excellence. Our optimized solutions are supported by teams of engineers and manufacturing personnel with wide ranging experiences in developing products deployed in highly demanding applications, such as electrical power systems, radar receivers, and stores management solutions, for ground or aerial defense platforms.

Teledyne is accredited by Defense Logistics Agency (DLA) in accordance with MIL-PRF-38534, Class H and Class G Qualified Manufacturers List (QML). Since 2014 Teledyne has successfully launched over twenty hybrids into production for our customers. We welcome opportunities to partner with our customers to provide customized solutions to your hybrid needs. Our typical custom solution development cycle is as follows:

Teledyne Relays offers electromechanical relays for various markets?

**RF RELAYS**
- Signal Integrity up to 40Gbps
- DC - 16GHz
- Surface-Mount
- DPDT, SPDT, 4PST and Loopback Relays

**MILITARY GRADE RELAYS**
- Built and tested to meet MIL-PRF-39016
- Built and tested to meet MIL-PRF-28776
- Built-in Diodes, Transistor Driver and CMOS
- Low Power coils

**TELEDYNE ESTABLISHED RELIABILITY RELAYS**
- Fully defined product requirements and screening levels
- Spacer/Spreader pad options not allowed by military specifications
- Reduced lead time and cost vs Military Grade

**HIGH PERFORMANCE RELAYS**
- -65 °C to +200 °C
- Shock up to 4,000 g’s
- Vibration up to 380 g’s
- Non-Latching & Magnetic-Latching

**COMMERCIAL RELAYS**
- Standard electrical tests at 25 °C
- “Low cost” switching solutions
- Surface-Mount
- Short lead times
Teledyne Coax Switches offers coaxial switches for ATE, Radar, Amplifier Switching, Etc.

**SPDT SWITCHES**
- DC - 40GHz, Internal 50 Ω Termination
- SMA, mini-SMB, TNC & N Connectors
- 5 Million Cycles
- High Power & Low PIM
- Failsafe & Latching

**TRANSFER SWITCHES**
- DC - 18GHz
- SMA, TNC & N Connectors
- 5 Million Cycles
- High Power
- Failsafe & Latching

**MULTI-THROW SWITCHES**
- DC - 40 GHz, Internal 50 Ω Termination
- SMA, mini-SMB, TNC & N Connectors
- SP3T - SP10T
- 5 Million Cycles
- Normally Open & Latching

**LOW PIM SWITCHES**
- DC - 3 GHz
- SMA, N and 7/16 D Connectors
- SPDT, Transfer and Multi-Throw
- Failsafe & Latching

**SPECIALTY SWITCHES**
- DC - 40GHz
- 3-State Attenuated Switch
- Radiation Shielding
- Switch Blocks
- Redundant Diode Configuration
Did you know...

Teledyne Relays offers Commercial/Industrial Solid State Relays?

SINGLE PHASE AC SOLID STATE RELAYS

- Up to 690Vac, 125A
- Input & Output Protection
- Chassis, DIN Rail and PCB Mount
- Zero-Cross & Random Switching
- Touch-Proof Covers

DUAL-PHASE AC SOLID STATE RELAYS

- Up to 600Vac, 50A
- Output Protection
- Chassis and DIN Rail
- Zero-Cross & Random Switching
- Touch-Proof Covers

3 & 4 PHASE SOLID STATE RELAYS

- Up to 600Vac, 75A
- Output Protection
- Chassis and DIN Rail
- Zero-Cross & Random Switching
- DC & AC Control

DC SOLID STATE RELAYS

- Up to 1400Vdc, 100A
- Output Protection
- Chassis, DIN Rail and PCB Mount
- IGBT and MOSFET
- Touch-Proof Covers

SOFT START MOTOR CONTROLLERS AND MOTOR REVERSERS

- Up to 26kW, 480Vac
- Star & Delta Configurations
- DIN Rail
- Output Protection
- Built-in Diagnostics and Self Test

Teledyne Relays offers Military Solid State Relays?

DC SOLID STATE RELAYS
- Meet MIL-PRF-28750
- Tested Per MIL-STD-704
- Silicon Carbide MOSFET
- Up to 250Vdc, 1A
- Chassis and PCB Mount
- Short-Circuit Protection
- Plastic and Hermetically Sealed

BI-DIRECTIONAL/AC SOLID STATE RELAYS
- Meet MIL-PRF-28750
- Tested Per MIL-STD-704
- Up to 250Vac, 25A
- Chassis and PCB Mount
- Short-Circuit Protection
- Plastic and Hermetically Sealed

COMMERCIAL, LOW POWER, I/O MODULES
- Up to 250Vac, 10A
- Short-Circuit Protection
- Chassis and PCB Mount
- Zero-Cross & Random Switching
- Low Off-State Leakage Current

SILICON CARBIDE TECHNOLOGY
- Up to 270Vdc, 20 A
- Meet MIL-PRF-28750
- Tested Per MIL-STD-704
- Low ON resistance
- Low Profile Hermetic Package
Did you know...

Teledyne Coax Switches offers coaxial switch matrices for ATE, Radar, Filter Switching, Airborne Surveillance Systems, Etc.?

MINI MATRICES

- Remote Control via USB and/or Ethernet
- GUI controllable
- Accepts ASCII code
- Available in 18, 26.5 and 40 GHz
- SPDT, Transfer and Multi-throw configurations

MULTIPLEXOR/FANOUT SWITCH MATRICES

- Up to 1x1024 Switch Matrix
- SMA, mini-SMB, TNC & N Connectors
- Failsafe, Latching or Normally Open Configurations
- Switching Systems for 50 Ω & 75 Ω applications

MIMO/BLOCKING AND MIMO SINGLE CONNECTION SWITCH MATRICES

- Up to 1x1024 Switch Matrix
- SMA, mini-SMB, TNC & N Connectors
- RS-232, TTL, USB, GPIB, TTL, Ethernet Control
- 1 Million Cycles
- Failsafe & Latching

CUSTOMIZED SWITCH MATRICES

- EMI/RFI
- Transient Suppression
- Ballistic Shock Fatigue
- Crash Load
- Altitude

Teledyne Relays offers Space Qualified Switches?

SPACE MARKET SEGMENTS SERVED

- Deep-Space Probes
- Manned Programs
- Communications Satellites
- Launch Vehicles
- Earth Observatory / Weather Satellites
- Commercial / Military Satellites

CAPABILITIES

- Logistic Infrastructure
- Chemical Analysis Lab
- Scanning Electro Microscope
- In-house Plating Shop
- Enviroment Test Lab
- Field Technical Support

ELECTROMECHANICAL RELAY SPECIFICATIONS

- MIL-PRF-39016
- MIL-PRF-28776
- NASA/GSFC S-311-P-754
- NASA EEE-INST-002
- ESA/SCC 3601 & 3602
